Business, ERP & Creative Tools: EpsilonNet Pylon ERP, Soft1 ERP, Business Evolution ERP, Adobe Photoshop, Canva, Microsoft Excel, Microsoft Word

Analytics & AI Tools: SEO, Google Analytics, Google Tag Manager, ChatGPT, Codex, Cursor, Claude, Gemini

PROFESSIONAL EXPERIENCE

Front-End Developer | archKATect | (Remote)

Jun 2025 - Jun 2026

- Built and styled responsive UI components using React, TypeScript, WordPress, Elementor Pro, and ACF.
- Resolved frontend bugs and responsive issues across desktop and mobile layouts.
- Translated mockups and screenshots into production-ready interfaces while maintaining visual consistency.
- Used documentation and AI-assisted development tools to troubleshoot issues and deliver maintainable solutions.

E-Commerce Developer | clickdom.gr | Athens, Greece

2022 - 2025

- Maintained and improved a WooCommerce store, covering frontend updates, troubleshooting, performance, and operational reliability.
- Automated repetitive product, inventory, and data workflows to reduce manual work and improve consistency.
- Managed product and supplier data across WooCommerce, Skroutz, BestPrice, Merchant Center.
- Implemented technical improvements related to site speed, security, and e-commerce operations.

- Managed large product catalogs and created SEO-focused content for e-commerce platforms.
- Built Python and AI-assisted automation workflows for content processing, product data, and inventory accuracy.
- Used CMS, image-editing, and data tools to improve listing quality and operational efficiency.

- Managed daily e-commerce operations, including product listings, inventory updates, order processing, customer support and promotional activities.
- Coordinated team workflows and cross-department projects, helping maintain efficient operations and a consistent customer experience.
- Progressed from Sales Associate to Team Manager and E-Shop Manager, taking on increasing responsibility across sales, e-commerce and project coordination.

SELECTED PROJECTS

FlowBoard | *React, TypeScript, Cloudflare Workers, Neon PostgreSQL* | [GitHub](#) | [Live Demo](#)

- Built a Trello-style project management application for organizing work across boards, lists, and cards.
- Developed and deployed a full-stack architecture with a React frontend, Cloudflare Workers API, and PostgreSQL database hosted on Neon.

AI SEO Generator | *Next.js, Tailwind CSS, shadcn/ui, Gemini API, Vercel* | [GitHub](#) | [Live Demo](#)

- Built an AI-powered tool that generates optimized page titles, meta descriptions, and keyword-focused content ideas.
- Integrated the Gemini API in a Next.js application and deployed the project on Vercel.

Selected WordPress Projects | *WordPress, Elementor Pro, ACF, Custom CSS, JavaScript*

- Built and customized production websites including [clickdom.gr](#), [Greek Luxury Holidays](#) and [Quantum Buildings](#), translating designs into responsive pages with custom styling and functionality.
